

Staffing Support

FLEXIBLE SOLUTIONS FOR YOUR UNIQUE REQUIREMENTS

Achieve maximum efficiency with Yorktel's on-site staffing

Yorktel's on-site staffing service provides both domestic and global clients with the complete in-sourcing operational support they need to achieve maximum efficiency. Our flexible on-site staffing service is designed to meet your environment's unique requirements, from providing a single staff member to several individuals with options for short or long term, temporary and contracted. With our staff on your premises, your teams can focus on strategy while we take care of the technology and ensure smooth operations.

Staffing Methodology

Yorktel designs client-specific on-site staffing models to ensure you receive the optimum balance of support services and cost containment. Available data on client support requirements, room counts and current operations are analysed to determine appropriate staff positions, competencies and head count. We then make recommendations based on our best practices derived from similar deployments.

Professional Personnel

Our on-site personnel are managed as part of a larger pool of experienced IT, AV and video conferencing support specialists under the direct leadership of our Operations department. Each has access to all of Yorktel's engineering resources and receives on-going training in new technologies and best practices. A custom Yorktel web portal provides on-site personnel with the ability

to manage and track room profiles, assets, trouble tickets, projects, attendance, billing and other real-time information needed to support the on-site operations. This gives you enhanced accountability through detailed reporting.

Yorktel Staff Augmentation Functions

Programme Management

- Single POC to Single POC to strategize and coordinate all collaboration services.

Operations Management

- Provide direct management and oversight of all on site technicians
- Ensure that all areas of conference/VTC room support are operating at optimal levels as per requirements

About Yorktel

At Yorktel, we make complicated simple. For 30 years, we've been the global managed services provider for some of the world's largest video communications networks. Our Continuity Managed Services portfolio includes staffing augmentation, technical support, maintenance, professional services, conference support and cloud-based hosting and bridging services. As part of our commitment to excellence, we have received ISO 27001 certification, the world's leading international standard for information security management, and numerous industry awards.

With thousands of video rooms under management worldwide, we have the proven expertise and global reach to deliver an enterprise-quality visual communications experience to our customers every day, every time.
